Internal batteries • household current • car battery

**PS-10/PS-20**

SINCE 1955

Suddenly, keyboard n  
out'n'about. Join

Now there's a great keyboard instrument—a *true* instrument—that goes everywhere you do. To the campus, camping, over to a friend's house for a jam session, off to parties for sing-alongs... anywhere on or off the road, indoors or out. But setting the keyboard free wasn't the only thing we did when we designed the PS-10 and PS-20. We also incorporated a level of sound performance that will please even the most discriminating of musicians. And included such famous Yamaha features as Auto Rhythm, Auto Arpeggio, and Single Finger Chord to help beginners sound great right from the very first day.

The PS-10 and PS-20 Keyboards are really many instruments in one. With just a flick of your finger, your Yamaha PS-10 Portable Keyboard becomes a String or Clarinet voice, a Piano, Harpsichord, Organ or Vibraphone. The PS-20 gives you an even wider range—it's really *ten* uniquely beautiful instruments in one. Imagine slinging an orchestra over your shoulder! That's just what the incredible PS-10 and PS-20 Keyboard instruments let you do.

# music's getting the fun!

## Anyone can play the PS-10 and PS-20—today!

Everyone can sound great playing the PS-10 and PS-20 Keyboards thanks to Yamaha's exclusive Automatic Bass/Chord (ABC) feature. All you have to do is depress either of the Start selectors and the Single Finger Chord selector and you're ready to go. Simply place one finger on any of the lower 19 notes (14 notes on the PS-10) and you'll immediately get a cor-

responding major chord and bass pattern which pulsates perfectly with any Auto Rhythm. These chords can easily be altered to minor, seventh, or minor seventh with just an additional finger or two. By using the Memory (combined with the Single Finger Chord on the PS-10), you can even remove your finger from the keyboard and still get Single Finger playing. And thanks to the separate ABC Volume control you get sound-mixing flexibility. So there you

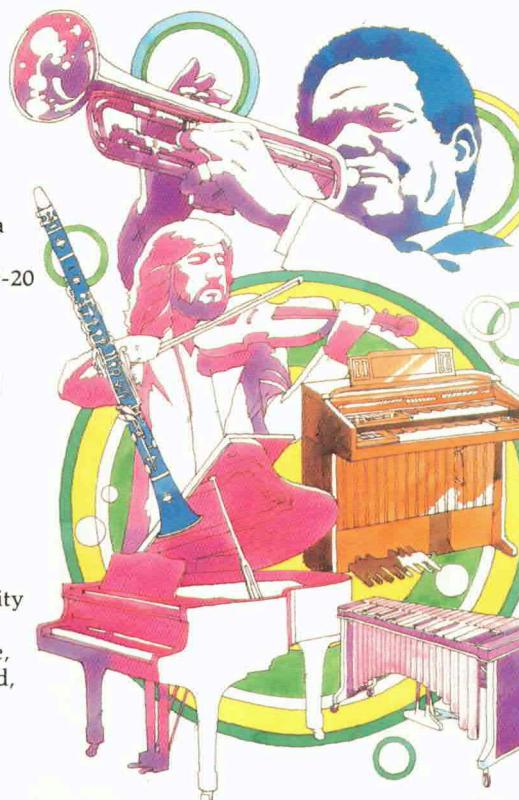

are—with just one finger you sound like a whole band!

The Fingered Chord selector on the PS-20 lets you play your own left-hand chords while still obtaining the bass and rhythm back-up—and this model also includes Multi-Bass to offer you more professional bass pattern variations.

## So many great sounds at your fingertips!

Never before has a musical instrument offered so much orchestral sound versatility in such a lightweight, compact package.

The PS-10 comes with an Organ voice, String voice, Clarinet, Piano, Harpsichord, and Vibraphone, plus Sustain effect. The PS-20 gives you all these plus another Organ voice, Trumpet, Oboe and Accor-

### 3-way power system

These keyboards have a three-way power system for true portability.

**Household current** This AC power adaptor slots into the underside of the body.

(U.S. model shown)

**Internal batteries** The battery pack is interchangeable with the AC power adaptor. Holds six SUM-1 batteries.

**Car battery** The optional car battery adaptor plugs into a car cigarette lighter socket (DC 9V).

PS-10

dion. But what's even more impressive is the incredible realism of these instrument sounds. Using PASS technology borrowed from our advanced electronic instruments, Yamaha has meticulously fashioned each voice to state-of-the-art authenticity. Just listen to that lovely floating Vibraphone sound or the String voice with built-in Vibrato Delay. With the PS-10 and PS-20, hearing is really believing! The Master Volume lets you control the level of the entire keyboard sound.

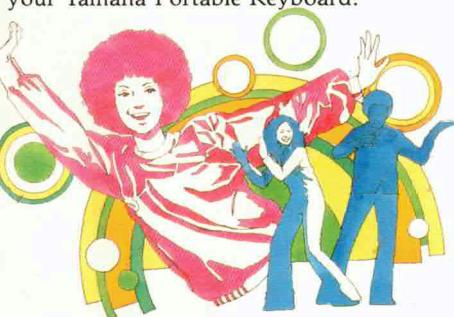

## Your own built-in percussionist

Not only do the PS-10 and PS-20 give you a choice of various melodic instruments, but they also feature dynamite little "drummers" as well. Clean, crisp percussion sounds for a wide variety of rhythms are yours simply by depressing a selector. The PS-20 gives you the additional fun of having an 8-bar rhythm variation so you can add in your own percussive "breaks" automatically every eight bars. The PS-10 provides a choice of Waltz, Rock, Swing and Latin beats while the PS-20 includes the first three plus March, an exciting Disco, Tango, Rhumba, and Samba. Some rhythms can even be combined to create great new percussive patterns. And with Synchro-Start, you can start a rhythm simultaneously with the first note you play on the lower part of the keyboard. Tempo

and Volume controls let you adjust the rhythm precisely to taste. A Tempo Light acts as a visual time-keeper.

### Rippling sounds of Auto Arpeggio

Even if you don't know what an arpeggio is, you'll enjoy the professional touch the PS-20's Auto Arpeggio adds to practically any piece of music. The PS-20 has two arpeggio patterns so that you can perfectly match this beautiful rippling accompaniment to the music. A volume control lets you bring in the Auto Arpeggio or take it out altogether from the music. Auto Arpeggio—it's one more big reason why you'll get more fun and excitement out of your Yamaha Portable Keyboard.

### A private world of music

Whether you're sitting beside a campfire under a million stars or in the hurly burly

of a Saturday afternoon living room, just plug in some headphones and enter a private world of music all your own. Once the headphones are connected the speaker is disconnected so you don't disturb anyone and no-one disturbs you.

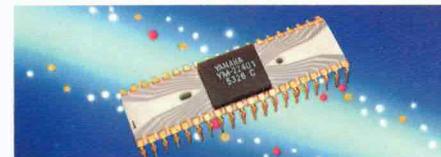

### Connect a stereo—the sound's dynamic

One of the jacks built into the PS-10 and PS-20 lets you connect the keyboards to a stereo system. This means you can feed the sound from your keyboard through your stereo system's amp and out through the stereo's speakers for a fuller, even more beautiful, more

dynamic sound.

### Technology's the secret

Worldwide, the Yamaha name is synonymous with fine music. Our decades of experience in crafting outstanding musical instruments and stereo components has made us an unrivaled leader in our field. This is all to your advantage when you choose one of the amazing PS Keyboards. Reliability and quality performance, born of our revolutionary PASS technology, and Yamaha-designed-and-made LSI circuitry, are guaranteed in these breakthrough Portable Keyboards.

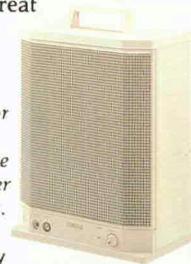

### Add to your enjoyment with PS-10/PS-20 options

Here are some of the great options available.

#### Tone Cabinet (TO-1)

This Tone Cabinet has been specially designed for use with your Portable Keyboard—it even has the same type of 3-way power system for full portability. With a power output of 5W (RMS), it weighs only 4 kg (8.8 lbs.) and measures 25(W) x 14(D) x 35(H) cm (9-7/8" x 5-3/8" x 13-3/4").

#### Expression Pedal (EP-1)

More feeling can be added to the music by making it go softer and louder using the optional expression pedal.

**Soft Carrying Case (S-1, S-2)** A smart-looking, durable vinyl case is available so you can safely carry your Portable Keyboard around with you.

**Connecting Cord (PC-2)** For connecting PS-10 or PS-20 to a stereo unit.

**Stand (L-1)** This attractively designed tubular stand supports your Yamaha Portable Keyboard to make music-making easier wherever you go. Stand Carrying Case (SC-1) is also available as

#### Bench (BC-2)

A lightweight bench for enhancing playing pleasure.

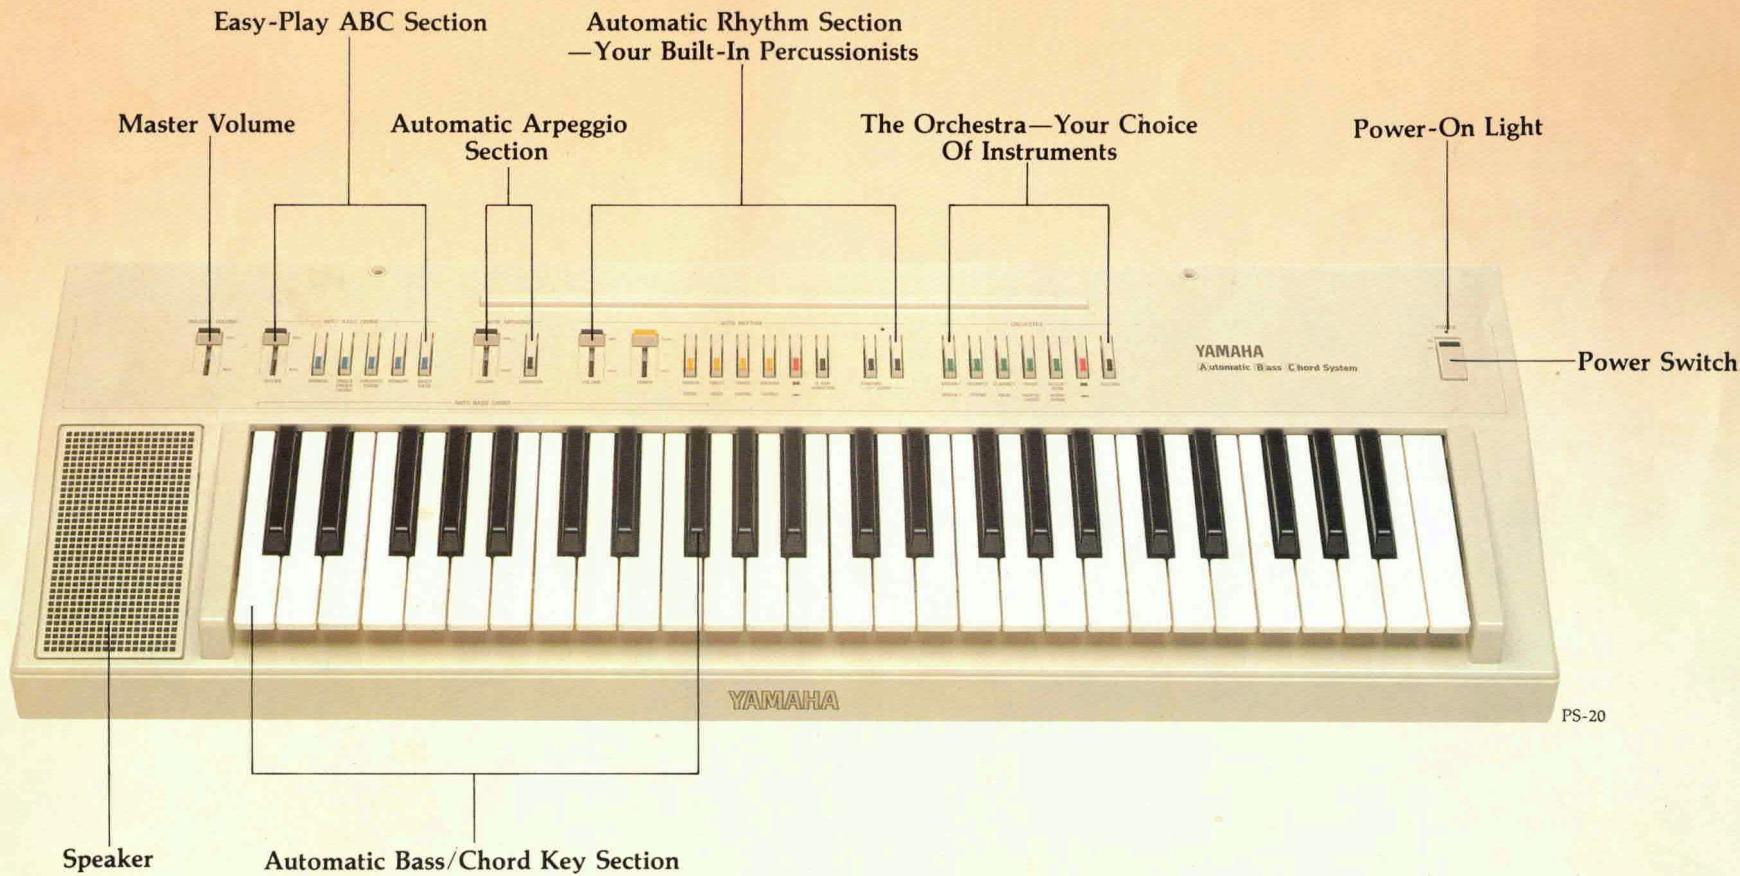

# An exciting new idea hits the music scene. . .

Just imagine: a keyboard instrument that offers all the tonal versatility and playing features of an organ and yet is just as portable as a guitar. That's exactly what you get with the new PS-10 and PS-20 Keyboards. No longer is this type of music confined to the living room because the instrument is too heavy or needs an AC outlet. You can take a Yamaha PS Keyboard with you wherever you want, play it whenever you like.

Employing our PASS technology—the same technology that's made the Yamaha Electone

Organ the best-selling organ in the world—these keyboards give you an incredible sound, unbelievable tonal versatility and amazingly sophisticated features. They even have a *3-way* power system (household current, internal batteries, car battery) for true portability. And they're so compact, so good looking.

The PS-10 and PS-20 Portable Keyboards from Yamaha. Go-anywhere music-making fun. For you. For today.

*Sling an orchestra over your shoulder*

## Here's a full list of what these great keyboards offer

### A Dynamic Orchestra Section

Your PS-10 gives you Organ, String, Clarinet, Piano, Harpsichord, and Vibraphone voices plus Sustain. The PS-20 has all these plus another Organ voice along with Trumpet, Oboe, and Accordion voices.
